Career Objective

Motivated Information Science Engineering student (CGPA 9.3) passionate about problem-solving, programming basics, and learning emerging technologies. Seeking opportunities to apply and grow my skills through challenging internships or apprenticeships.

Education

B.E. in Information Science , Sapthagiri College of Engineering – CGPA: 9.3	2022 – 2026
PUC - PCMC , Cluny Convent PU College – 91.83%	2020 – 2022
SSLC - KSEEB , Rainbow International School – 97.12%	2019 – 2020

Internships

Software Engineering Apprentice, Boeing India (Bengaluru)	Aug 2025 – Present
- Selected through VTU centralized placement cell for the prestigious Boeing Apprenticeship Program. - Contributing to the Engineering Product function, involving test planning, execution, and reporting tools (TPERT). - Gaining hands-on exposure to large-scale software systems, enterprise tools, and cross-functional engineering workflows.	
Foundations of AI, Edunet Foundation (Virtual Internship)	Apr 2025 – May 2025
Learned Python basics and introductory machine learning workflows.	

Projects

Missing Child and Criminal Identification – Final Year Project (Phase 1 completed in 6th Sem)	Deep Learning + AI (Ongoing)
- Developing a real-time and Age-Variant facial recognition system to identify missing children and wanted criminals through public surveillance footage. - Integrates a centralized database of facial profiles and cross-references them with live video feeds. - Leverages advanced AI and deep learning algorithms (Python, OpenCV, TensorFlow) to detect potential matches in real time. - On a positive match, automated alerts are generated to notify relevant authorities for immediate action.	
Edutainment Platform – Educational On-Demand Video streaming service	Python + AWS
Implemented video upload, storage, and streaming using AWS S3 and CloudFront.	
School DBMS – Role-based portal for students and teachers	Python + MySQL
Built CRUD operations with Python and MySQL and integrated secure login credentials, to upload and view notes, lecture videos.	
QR Code Generator – Converts text/links into QR codes	Python
Developed using Python's qrcode library to generate downloadable QR images.	
Tic Tac Toe – 2-player GUI game	Java
Created with Java Swing, implementing full game logic and user interface.	
Bank Management – Console app for transactions	C++
Implemented account creation, balance updates, and transaction history in C++.	

Certifications

AWS Academy Cloud Foundations (Apr 2025)
 Edunet Virtual AI Internship (May 2025)
 NPTEL: Database Management Systems (Sept 2024)

Technical Skills

Programming: C, C++, Java, Python, C#/.NET (learning)

Concepts: Problem-Solving, APIs, Data Structures, OOPs, Operating Systems, Computer Networks(Basics), Cloud Computing, AI/ML

Database: MySQL, SQLServer, MongoDB

Soft Skills: Teamwork, Communication, Quick Learner

Languages

English, Kannada, Telugu, Hindi
